EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes were made in the claims:

In claim 26, line 6 was deleted and
following line 8 (between lines 8-9), --differentially comparing the level
shifted sense signal to the sensed output voltage;--.

Authorization for this examiner's amendment was given in a telephone interview with Brett Hertzberg on January 31, 2006.

STATEMENT OF REASONS FOR ALLOWANCE

Claims 1, 3-6 and 12-24 now expressly recite a specific arrangement wherein the "current sense circuit" includes a transistor connected via a resistor to the load. Claims 7-11, 25 and 26 recite a specific arrangement further including "level shifting means" to level shift the "sense signal". Since none of the cited prior art references disclose an arrangement further including these features, the case is in condition for allowance.
